DYMARIS delivers integrated operational support and modernization for complex programs. Built to integrate into active environments and deliver coordinated execution across technology, staffing, logistics, and facilities — structured for continuity, accountability, and sustained performance across national and international programs. DYMARIS regularly supports prime contractors as a subcontract delivery partner, augmenting delivery capacity for active programs and proposal efforts.

CORE CAPABILITIES

Integrated Services for Complex Programs

Enterprise Technology Solutions

Office Modernization • Workflow Automation • CRM & Case Management • Data Integration & Reporting

Digital modernization services that transition legacy and manual processes into structured, technology-enabled workflows. Solutions include deployment of CRM and case management platforms (Microsoft Dynamics 365, ServiceNow), Power Platform automation, cloud collaboration tools, and reporting dashboards designed to improve decision-making visibility across program offices.

Complex Program Coordination

Program Management • Cross-functional Coordination • Stakeholder Alignment

Program management and coordination services for multi-disciplinary initiatives. Expertise spans technology integration, workforce coordination, logistics alignment, and facilities management — ensuring unified execution across interconnected program requirements and stakeholder environments.

Facilities & Operations

O&M • Infrastructure • Security

Operations and maintenance frameworks supporting continuous operations. With experience managing comprehensive base life support and facility construction, DYMARIS ensures secure and compliant infrastructure management across large-scale federal facilities and campuses.

Workforce Solutions

Cleared Personnel • Subject Matter Experts • Workforce Augmentation • Linguist Support

Strategic talent acquisition, onboarding, and deployment of cleared professionals and specialized subject matter experts supporting sensitive government programs. Capabilities include surge staffing, workforce augmentation, training services, and linguist support (Spanish, Arabic, Dari, Pashto, Mandarin, and other critical languages).

Logistics & Supply Chain

Procurement • Distribution • Readiness

End-to-end logistical support structured to improve efficiency. Capabilities reflect complex material distribution, international coordination, and resilient supply chains during mission-critical deployments. Expertise in global logistics execution, transportation coordination, and materiel handling for federal operations.

Program Support Services

Acquisition • Financial • Compliance

Administrative, financial, and regulatory support designed for operational reliability. We navigate federal acquisition processes (FAR/DFAR), ensure strict adherence to regulatory compliance standards, and provide change management and organizational transformation support during major program implementations.

PAST PERFORMANCE

Demonstrated Operational Experience

CAPABILITY AREA	DEMONSTRATED EXPERIENCE
High-Volume Mission Support	Team members supported U.S. Government critical missions processing 85,000+ individuals with comprehensive rapid-response services including contact center operations, case management, administrative coordination, and multi-location logistics for time-sensitive federal programs.
Base Life Support & Logistics	Provided comprehensive logistics and life support in complex operational environments — equipment transportation, facility construction, perimeter security infrastructure, supply chain management, housing, medical services, food service, and full-spectrum operational support.
Interagency Coordination	Managed complex coordination between DoD, State Department, DHS, and HHS — expertise in data systems integration, web-based collaboration platforms, case tracking systems, and cross-agency process optimization for multi-stakeholder programs.
International Operations	Team experience managing multi-million-dollar grants and contracts for international programs — proven expertise in overseas operations, global logistics, cultural adaptation strategies, and compliance with U.S. Government regulations for foreign assistance programs.
Federal Operations Expertise	DYMARIS leadership includes former federal employees with direct operational experience across multiple agencies — deep understanding of FAR/DFAR requirements, government acquisition processes, and mission execution in high-pressure federal environments.

WHY TEAMS CHOOSE DYMARIS

The DYMARIS Advantage

Agile Operating Structure

Lean organizational model enabling direct decision-making, reduced administrative layering, and efficient coordination across functional domains. Supports faster onboarding, clear accountability, and responsive execution while maintaining alignment with required governance and reporting standards.

Unified Multi-Disciplinary Capability

Integrated delivery across enterprise technology modernization, workforce solutions, logistics coordination, and facilities operations. Reducing fragmentation between disciplines improves communication flow, strengthens execution consistency, and simplifies oversight across interconnected program requirements.

Mission-Embedded Experience

Operational experience within regulated, high-demand, and mission-driven environments — including former federal employees with direct agency experience. This perspective supports disciplined coordination, informed decision-making, and steady performance across complex operational settings.

Accountability-Driven Delivery

Structured documentation practices, defined reporting channels, and performance visibility mechanisms embedded within delivery models. Supports audit readiness, contractual adherence, and operational transparency across national and international program environments.
